Instant Whole Milk Powder

Description:

Whole Milk Powder is produced from fresh whole milk which has been spray dried and instantized. It is instantly dispersible in hot or cold water. Instant Whole Milk Powder is excellent as a beverage or as an ingredient in other food or nutritional products.

Packaging:

Twenty-four 13 oz. cans (368 g), six 2 lb. cans (.9 kg), or six 4 lb. cans (1.8 kg). Metal cans have full-panel, easy-open covers. Cans are fitted with plastic overcaps for re-closing once can is opened. Instant whole milk is nitrogen packaged for long shelf life and fresh flavor. Shelf life for product in cans is 2 years.

Product is also available in 25 and 50 pound bags. Shelf life for product in bags is 6 months.

Typical Analysis:

Protein	25.5%	Flavor and Odor	Typical
Fat	26.0%*Min.	Solubility Index	1.0 ml Max.
Moisture	4.0%	Particle Size	100%/12 mesh
